

Energy 2.0 presents

# Ruby Carat: Communicating the Science of LENR/Cold Fusion

Ruby Carat has developed videos to educate scientists, engineers, and the general public about LENR for many years. Ruby will describe how she discovered “Cold Fusion” and why it is important that others learn about its potential as a clean energy source. She will also share personal impressions and stories about the fascinating people she has interviewed, including Andrea Rossi.

We recommend you watch these YouTube videos from the Navy LENR Research Series before the webinar: “Following Nature's Documents Stan Szpak LENR Co-deposition” and “Anomalous Effects in Deuterated Systems Melvin Miles the Correlation of Heat and Helium.”
